Fleet Intelligence Simplified

# GPS Trackit and Fleetio: A Powerful Pair

Connect your GPS Trackit telematics data with Fleetio to save time and automate your preventative maintenance workflows.

Whether you handle maintenance in-house or outsource service, Fleetio enables an efficient process from trigger to resolution, all while providing detailed data at every turn. Connecting GPS Trackit telematics and Fleetio creates a comprehensive solution, surfacing critical information from telematics devices to automate preventative maintenance workflows.

## Integration Functionality

 **Faults/DTC/  
Alarm Codes**

Get notifications in Fleetio when a DTC code or Engine fault is identified on a GPS Trackit device and create Issues in Fleetio with one click! Easily assign Issues to mechanics or initiate maintenance workflows.

 **Odometer  
readings**

Keep assets mileage/meters current and trigger preventative maintenance reminders to automate the maintenance management workflow.

 **Location**

View asset location in Fleetio on the vehicle profile screen.
